

UNCOVER EMERGING SCIENCE

Connect-the-Dots Solution

*Scientists powered by **ML & Deep Web** tools*

www.patent-art.com

This document is intended solely for the information of the client to whom it is addressed

ABOUT SCITECH PATENT ART (SPA)

- Established in 2002...one of India's leading technology intelligence firms for more than 17 years
- Maintaining confidentiality is core to our business
- Serve Fortune 500, universities and law firms
- 95+ advanced degree scientists and technologists

Our Difference

Human experts powered by data engineering & AI / ML tools

Client advantages: Cost, Turnaround Time & Quality

OUR DIFFERENCE

- Extensive knowledge of databases and data sources
- Deep Web crawling, Big Data and machine learning analytics

**DATA ENGINEERING
&
AI/ML ANALYTICS**

**TECHNOLOGY
DEPTH**

- 95+ analysts in various technical disciplines
- Over 100,000 technical documents (patents, publications, websites,...) analyzed every month

**INNOVATION
SUPPORT**

- Over 17 years experience in supporting innovation teams
- Managers equipped to quickly turn a query into specific deliverables

TO UNCOVER EMERGING SCIENCE, SCIENTISTS NEED TO CONNECT-THE-DOTS

- **CONNECT-THE-DOTS Definition**
 - Connecting knowledge available in various sources to extract unique insights
- **Example**
 - Run into an individual at a conference → look-up her webpage → find interesting publications → a large group of collaborators → one collaborator is working with a start-up in Israel → Israeli start-up has very interesting patents → Israeli start-up's research is sponsored by a competitor ...and so on
- **Connecting-the-dots, however, is a time-consuming task and requires expertise in various data sources**
 - Patents, technical literature, websites, annual reports, start-up databases, NIH grants, Google Scholar

SPA's solution allows scientists to Connect-the-Dots seamlessly and rapidly

BENEFITS OF SPA'S CONNECT-THE-DOTS SOLUTION

- **Scientists play in a well-defined sandbox...no time is wasted in sifting through noise**
 - Experts extract relevant information and pre-load in the database
 - Information is curated (humans assisted by machine) in a meaningful way
 - Search interface is intuitive and easy-to-use...no need for any searching expertise
- **Many information sources are covered and search results are linked to each other...easy to “connect-the-dots” for any scientist**
 - Patents, technical literature, websites, start-up databases, NIH grants, etc.
 - All information is linked across sources using author, affiliation and technology tags
- **Visualizations are meaningful and can be presented in management reviews seamlessly**
 - Many visualizations are available...can be further tailored to users' requirements
 - Charts can be downloaded, shared, printed, etc. easily

SPA's solution is supported by searchers with deep technical expertise...cost-effective, rapid deep-dives complement the Connect-the-Dots solution

EXAMPLE SCREEN-SHOTS OF SPA'S CONNECT-THE-DOTS SOLUTION [1 OF 2]

CLOUD BASED

CLUSTER VISUALIZATION

The screenshot displays the SCITECH PATENT ART portal interface. The top navigation bar includes links for Home, Reference, Document Network, Help, and Admin Astellas. The main content area is divided into three sections:

- Login Section:** Features the SCITECH PATENT ART logo, a login form with fields for email (admin@patent-art.com) and password, a "Remember me" checkbox, a "LOGIN" button, and links for "Register" and "Forgot password?". A large red banner on the right says "Connect the dots portal by SciTech Patent Art".
- Cluster Visualization:** A central network graph showing connections between "Patent" (red dots) and "Tech Literature" (black dots). A "Growing cluster" is highlighted with a red dashed box.
- User-Defined Curation:** A sidebar on the left contains filters for "Technology Classification" (Focus, Target disease, Modality/technology, Biology, Mode of administration, Target disease Category) and "Inventor/Author" (Search, KOL, Rising Star, NIH Grant, Albert Edge, Jeffrey M Karp, Shaowen Bao). A "Patents" section shows a line graph of "Total Analysed Articles: 2717" with "Selected: 364" and "Remaining: 2353".

Additional charts on the right include "Selected Technology Distribution", "Selected Year Distribution", and "Selected Author Distribution (Top 10)".

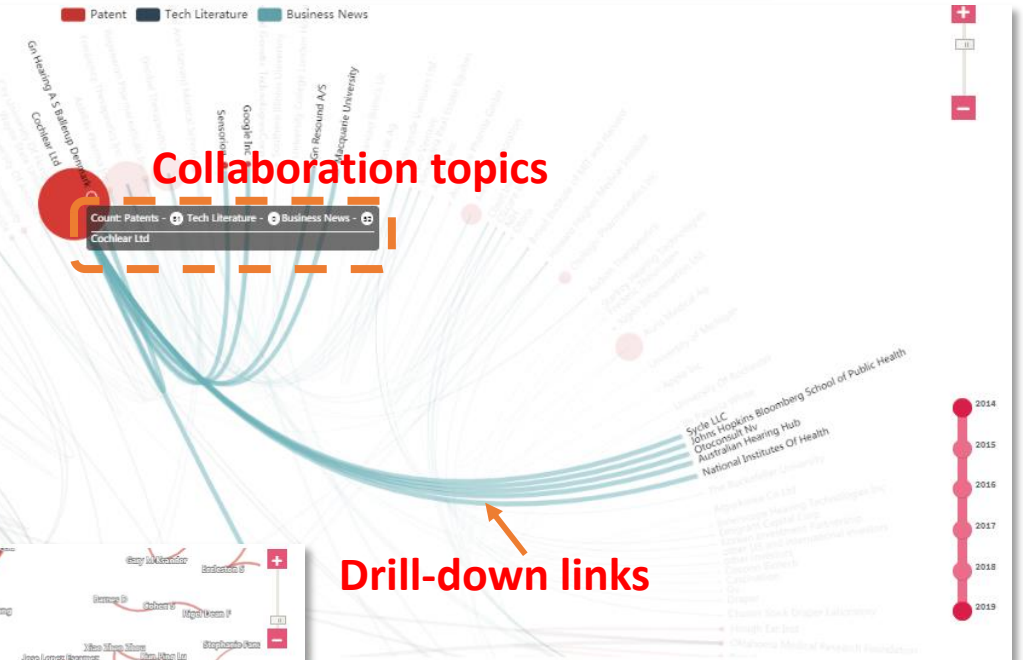

Option to search by KOL

KEY DIFFERENTIATORS OF SPA'S CONNECT-THE-DOTS SOLUTION

RANGE OF TOOLS / SERVICES IN THE MARKET

AI/ML software (Quick-and-Dirty)

Advantages

- Rapid
- AI/ML enabled
- Interactive

Disadvantages

- Data quality poor
- No one to answer questions / refine
- AI/ML accuracy

Nice charts but decisions cannot be made/defended

SCITECH
PATENT ART

Quick & Clean (Machine + Human)

Advantages

- Rapid answers / interactive
- High quality data
- Custom analysis
- Human to answer questions

Disadvantages

- Turnaround time of 4-6 weeks for initial portal development

Nice charts which allow decision making

Slow & Clean (Human)

Advantages

- High quality data
- Analysis customized
- Human to answer questions

Disadvantages

- Long turnaround time
- Quality varies by analyst
- Need to manage humans

Decisions can be made based on analysis but answers come very slowly

- Globally accessible
- Unlimited user licenses

SCITECH
PATENT ART

CONNECT-THE-DOTS STANDARD* WORK PROCESS

Define sandbox (2-3 weeks)

- Technology boundaries (e.g., oncology with a focus on immunotherapy)
- Data boundaries (e.g., patents, literature, grants, clinical trials,...)
- Curation requirements (e.g., biology, modality, technology, DDS, etc.)
- Any specific interface requirements (e.g., heat maps, network maps)

Test Trial Solution (3-4 weeks)

- Iterations between SPA experts and client scientists on curation standards
- User trials with interface
- Refinement and finalization of curation/interface

Final Solution

- Set up user accounts
- Data update requirements
- Any other specific technical deep-dive requirements, as needed

** Time-lines shown may vary depending on the size of the sandbox*
